

# VERT™

## Introducing VERT 3.1

Vertual are delighted to announce the release of VERT 3.1 with many new features and improved usability

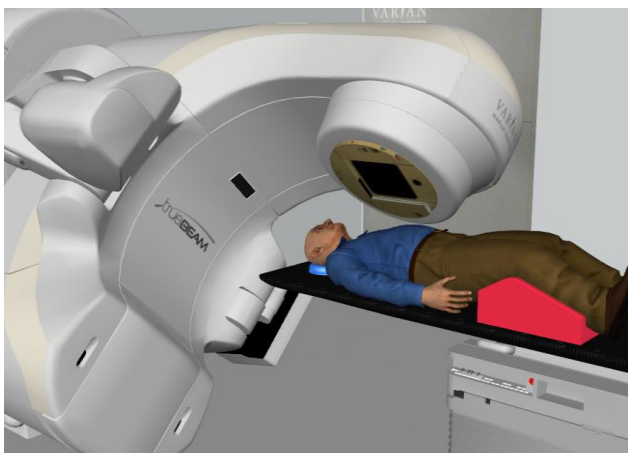

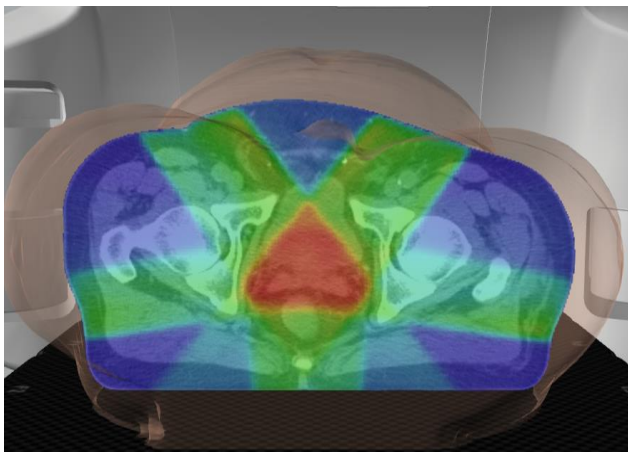

### Key Developments

- Accompanying training materials and new plans
- CBCT import work instruction
- New Versa HD machine model
- Full Body Adult Male – with knee immobilization
- Improved Virtual Presenter and tracking function
- Ability to load Proton plans (although beams will not display)

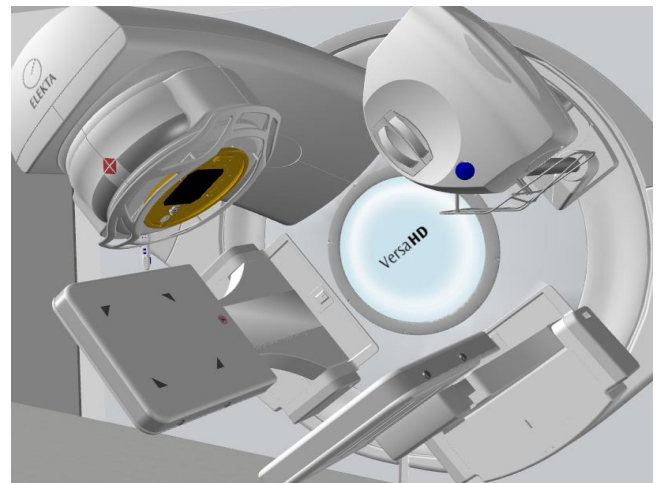

## Training Materials and Plans

- CPD sessions created by Radiation Therapy Professionals for Professionals
- Prostate and Cervix workbooks design for inter-professional learning
- Patients and materials provided
- New palliative plans included – help teach palliative techniques and surface anatomy

## Adult Male

- Introducing the new adult male model, with or without pelvic immobilisation
- Compliment your prostate sessions with the adult male model.

## Versa HD

- Vertual are pleased to announce the complimentary update for all Elekta customers
- Versa HD model

## CBCT Import Instruction

- Improved interface making CBCT import possible
- Support and guidance documentation about CBCT import is available by emailing [support@vertual.co.uk](mailto:support@vertual.co.uk)
